Explanations on major accounting information and financial indicators of the Company:

The year-on-year decrease in operating revenue for the period was mainly due to a reduction in orders for the Company's export business, resulting in a year-on-year decrease in revenue; fewer project completions, inspections, and settlements in the industrial internet and smart manufacturing segments during the first half of the year, leading to a year-on-year decrease in revenue; intense competition in the existing market for power supply and communications businesses, resulting in a year-on-year decrease in revenue; the year-on-year increase in net profit attributable to shareholders of the Company was mainly due to a year-on-year increase in income from the Company's investment in its associate, LG Panda, and gains on disposal generated from the completion of the liquidation of the Company's associate, Beijing Se Potevio Mobile Communications Co., Ltd., during the period. The year-on-year decrease in net cash flows generated from operating activities was mainly due to a decrease in cash received from sales of goods and rendering of services.

### **(II) GOING CONCERN**

This financial statement is prepared on a going concern basis.

### **(III) SEGMENT INFORMATION**

According to the Company’s internal organizational structure, management requirements and internal reporting system, three reportable segments were identified, namely: smart transportation and safe city, green service-oriented electronic manufacturing, industrial Internet and intelligent manufacturing. The Company’s various reportable segments provide different products or services, or engage in business activities in different regions. Due to the need for different technologies or market strategies for each segment, the Company’s management monitors the different segments in respect of their business activities separately, and evaluate the operating results on a regular basis in order to allocate resources and evaluate their performance.

The transfer prices between segments are determined based on the actual transaction prices. Indirect expenses that are attributable to each segment are allocated among the segments in proportion. Assets are allocated based on the operations of the segments and the location of the assets. Segment liabilities include liabilities arising from the segment’s operating activities that are attributable to the segment. If expenses related to liabilities that are jointly borne by multiple operating segments are allocated to these operating segments, the jointly borne liabilities are also allocated to these operating segments.

Non-current assets are classified according to the region in which the assets are located in, and the Company’s non-current assets are all located in the territory of China.

The following tables set out the segment information for the year ended 30 June 2025 and the year ended 30 June 2024.

#### **4. *Performance Obligations***

The Company shall recognize revenue when it satisfies the performance obligation in the contract by transferring the control over relevant assets (goods or services) to the customers.
